Natural FX Coatings

Natural FX Coatings are a state of the art multi-coat finish that allow for patterns of unparalleled detail and subtle depth. Metal never looked so good!

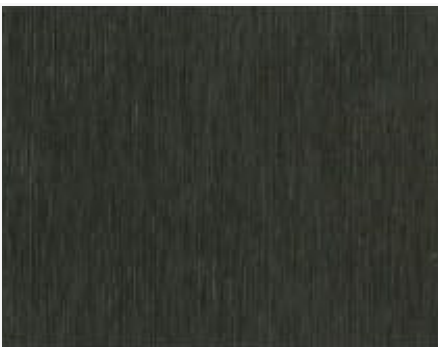

FX Bright Nickel

FX River Rock

FX Gunmetal

FX Coal Creek

FX Aged Granite

FX Pine Bronze

FX Night Sky

FX Iron Oxide

FX Desert Rust

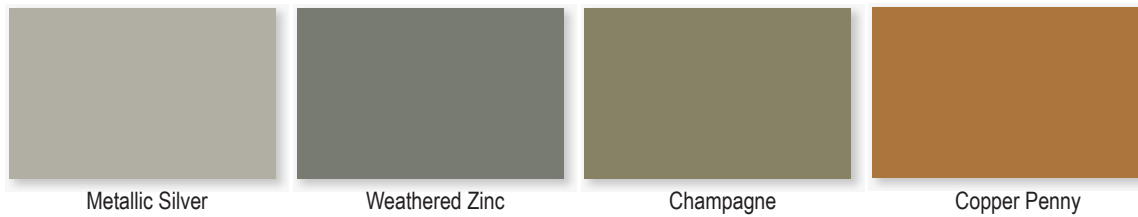

Natural FX Coatings are a Kynar 500®/Hylar 5000® resin that offer industry leading protection against fade and chalking. All *Natural FX* materials carry a comprehensive non-prorated finish warranty.

Premium fluoropolymer Kynar 500® or Hylar 5000® finishes are available over a wide range of substrates including Galvalume®, galvanized and aluminum.

SRI - Solar Reflectance Index per ASTM C 1980. Reflectivity - Initial Solar Reflectance per ASTM C 1549.
Emissivity - Thermal Emissance per ASTM C 1371.

CUSTOM COLORS

Bryer is a leading supplier of custom colors and specialty finishes, including hi-builds, 3-coats and marine environment systems. We can match virtually any color, including exotics and high gloss finishes.

STANDARD WARRANTY

Bryer's standard Kynar 500® / Hylar 5000® coated steel and aluminum come standard with a 35-year non-prorated limited finish warranty covering film integrity, chalk and fade. These warranties are not valid on some specialty coatings. Bryer also offers custom marine systems designed for use in coastal environments that have an available 20-year finish warranty. Please contact your Bryer representative for product or color specific warranty information.

NATURAL FX WARRANTY

Bryer's Natural FX Coatings come standard with a 25-year non-prorated limited finish warranty. Additional information, including sample warranties, are available from your Bryer representative.

NOTES:

Not all colors and finishes depicted have the same cost or availability. Contact your Bryer representative for a product specific quote. Metallic colors are batch sensitive and directional by nature. Color and appearance variation are typical and should be expected.

The natural metals depicted on this chart are bare unpainted materials. Color, gloss and general appearance will vary greatly. In addition, most natural metals will weather and change appearance once exposed to the atmosphere. This weathering is an ongoing process which may result in significant changes over time.

Most painted product is supplied with a protective strippable film. This film must be removed immediately after installation and should not be left exposed to the sun.

Bryer Kynar colors come standard with an AZ-50 Galvalume substrate. Some specialty colors, including Vintage, come standard with a G90 galvanized substrate.

Colors shown are for reference only. Inquire for color chips or panel samples.
